

Topcon CR-S2

Capture reality with unmatched speed and flexibility.

The Topcon CR-S2 combines MLF-SLAM (multiple localization fusion-SLAM), VSLAM (visual SLAM), and RTK-SLAM technologies. This integrated approach delivers stable, centimeter-level accuracy - even in areas where GNSS signals are weak or unavailable - by leveraging LiDAR, visual, IMU, and RTK data. High-fidelity point clouds and real-time colorized imaging ensure actionable results in a single workflow, minimizing return visits and rework.

- » Capture data on the move with a truly portable solution.
- » Simplify your workflow from field capture to final processing.
- » Achieve survey-grade accuracy without the need for extensive setup.
- » Scan diverse environments, from dense forests to urban canyons.
- » Integrate seamlessly with Topcon software for a complete solution.
